## **DETAILED ACTION**

### ***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### ***Allowable Subject Matter***

2. Claims 1-9 are allowed.
3. The following is an examiner's statement of reasons for allowance:

The prior art of records to and all other cited references, taken alone or in combination, fails to teach or fairly suggest the specific structure or the method of a holographic ROM system comprising, among other things, mask for modulating a certain portion of the expanded laser beam to thereby generate a signal beam which is directly provided a holographic medium and sifting the remainder portion of the expanded laser beam to thereby generate reference beam which is provided conical mirror reflecting the reference beam toward the holographic medium, wherein holographic medium includes: a recording region onto which both the reference beam and the signal beam are projected; and a transparent region which passes through the reference beam sifted by the mask, to thereby provide the reference beam to the conical mirror as set forth in the claims combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The patents to Jachimowicz et al (US 5,789,733); Custis (US 6695213); Hesselink et al (US 6104511); Campbell et al (US 5835470); Kirk (US 4566031); Hart et al (US 5675437); Yagi et al (US 6556531) are cited as of interest and illustrate a similar structure to an apparatus and system of a holographic ROM system.
